U.S. Department of Agriculture

## BOY OR GIRL HOLLIES (sex guaranteed) "Sure-Thing" offer

Hollies really do come in both sexes. The female Holly has berries. The male Holly never has berries. However, please remember to order a male Holly for female Hollies will not bear berries unless there is a male around.

These are larger and heavier than any we have ever sold by parcel post. Four to twelve inches high, in four-inch pots. Packed in polyethylene bags, in the pots they are growing in. Shipped in strong cardboard boxes, one Holly to the box. One to two years of age. In Oak Leafmold. Hardy. The best that you can buy.

### PRICE:

\$2.00 each POSTPAID (Your Choice of variety, see our catalog)

## SEEDLING HOLLIES (sex unknown) "Pig-in-the-poke"

The odds are about the same as with children. You never know just how they will turn out. Chances are, tho, that a "family" of three seedling baby Hollies will have either two boys and a girl or two girls and a boy Holly. We don't know. You won't either, for several years, as Hollies from seed have to "grow up" before they blossom or berry. They are not like the \$2.00 varieties at the top of the page, for these will berry and blossom at very early ages. However, our seedling Hollies are very economical and fun to try, anyway.

### PRICES:

75 cents each, postpaid.

\$1.50 for three, postpaid, three to the carton.

These are shipped in smaller three-inch pots and are three to ten inches in height, two years of age.

## EARLE DILATUSH'S HOLLY FARM

R.F.D. #1, HIGHWAY U. S. 130

ROBBINSVILLE, NEW JERSEY

(1/2 way between N. Y. C. and Phila.)
